Free Shipping for Online Purchases		Free with \$45 purchase	Free with \$50 purchase	Free with ship-to-store; check website	No	Free shipping on all above products

Recommendations and notes:

- All prices were checked online **09/04/2011**. Prices and selection in store may vary.
- Wal-Mart had a very limited selection online, but you may have different luck at the store.
- The high prices of the TI-83 may mean it is an aging model; it could be on its way out of the market. The math department would highly recommend the TI-84 plus from Staples.
- **Please bring in the TI Technology Points certificates on the packaging of your calculator! EAHS can use these to buy more calculators. There just might be a reward waiting for you if you do!**
- Other brands (Casio, Sharp) are not well known amongst students or teachers, so these are **not recommended**.
