

Elizabethtown Area High School Mathematics Department

The goal of distributed homework problems is to give students efficiency in problem solving in the related subject and to help them gain proficiency in the subject matter. All steps and calculations made during the solution of homework problems must be indicated.

Homework Policy

Homework assignments meet the following description:

- Short term.
- Typically assigned overnight.
- Due at the beginning of the following/next class period.
- May be randomly collected and evaluated.

Used for:

- Practicing a new skill - *Practice*
- Prepare students for new material - *Prepare*
- Elaborating content that has already been introduced - *Elaborate*

Evaluation:

- Standards' based.
- May evaluate the actual assignment or give a short quiz based on the assignment.
- Homework that is handed in late will earn 50% or less of the total points for that assignment.
- Homework assignments will not exceed 10% of quarter grade.
